Subject: Modification of Agreement to Lease at 3280 South Miami Avenue, Miami
for the Museum of Science, Inc.
Property # 4114-00-00

The attached Modification of Agreement to Lease has been prepared by the County Attorney's Office and is recommended for approval. This Modification of Agreement is retroactive due to the time required to resolve the issues arising from the unusual history of this lease and the prior negotiations to modify the agreement.

PROPERTY: 3280 South Miami Avenue, Miami.

COMMISSION DISTRICT: 5

OWNER: Miami-Dade County

TENANT: Museum of Science, Inc.

USE: A portion of Tract 3 of VIZCAYA JAMES DEERING ESTATE, as recorded in Plat Book 34 at Page 46 of the Public Records of Dade County, Florida for the operation of a Museum of Science and Planetarium.

JUSTIFICATION: The Museum of Science, Inc. (Museum) currently leases space and facilities on a portion of Tract 3 of VIZCAYA JAMES DEERING ESTATE. The proposed Modification of Agreement will ensure that the Museum will continue to occupy this space until it builds and occupies a planned new facility at a different location, with funds allocated for that purpose in the General Obligation Bond.

The current Lease Agreement was entered into in 1981 and subsequently modified in 1989. In 1998, the Board of County Commissioners approved an additional modification to the agreement, but that 1998 modification was never executed by either party. When it was recognized that neither party had executed the 1998 modification agreement, the County Attorney's Office advised that the modification should be resubmitted to the Board for approval because so much time had lapsed and because key assumptions had changed.

The unexecuted 1998 modification envisioned that the Museum would stay at the current site indefinitely, and would build a 25,000 square foot addition to the existing building. These assumptions were rendered obsolete by the voter's approval of the Building Better Communities Bond Program (GOB), which provided funding for (1) the Museum to build a new museum of science facility at a different site, and (2) the Vizcaya Trust to modify and occupy the Museum's current facility for its own use. In light of these changes, the County Manager and Museum have negotiated a new Modification to Agreement to reflect current conditions and capital plans.

PURPOSE OF MODIFICATION:

- a) To extend the lease term of the premises to run for ten years from August 21, 2006 or until one year after the certificate of occupancy is issued for the new Museum of Science building funded through the GOB, whichever is earlier, as specified in the modification.
- b) To eliminate the provisions of the Original Agreement and the 1989 Modification Agreement regarding the building of a 25,000 square foot addition to the current Museum of Science facility, including any requirement that the Museum build such an addition within a specified time.
- c) To require that the Museum seek the advice and consent of the Miami-Dade County Office of Historic Preservation, through the County Manager's Office, in the event that the Museum of Science desires to make any changes to the leased premises during the term of this Lease Agreement that will impact the historic nature of, or any historic structure on, the leased property.

EFFECTIVE DATES
OF MODIFICATION:

This Modification of Agreement shall become effective upon approval by the Board of County Commissioner and shall be retroactive to August 21, 2006.

CURRENT LEASE:

The current lease agreement was approved by the Board on July 21, 1981 by Resolution No. R-1176-81. A modification was approved by the Board on July 25, 1989 by Resolution No. R-934-89.

COMMENTS:

The Executive Committee of the Board of Trustees of Museum of Science approved this modification of lease agreement at its meeting of February 27, 2007.

Attached for your information is a copy of the previously approved resolution and memorandum with data concerning the lease.

Modification of Agreement

On the _____ day of _____, 2007, Miami-Dade County and the Museum of Science, Inc. agrees as follows:

1. Since 1960, Miami-Dade County and the Museum of Science have had agreements whereby Miami-Dade County leases certain property to the Museum of Science for the operation of a museum of science and planetarium. The current agreement (hereinafter referred to as the "Original Agreement") was entered into on August 27, 1981. This agreement was amended by a Modification of Agreement dated July 25, 1989 (hereinafter "the 1989 Modification of Agreement.").
2. In 1998, the parties negotiated, but never executed, a Modification of Agreement (hereinafter "the 1998 Unexecuted Modification of Agreement"). The 1998 Unexecuted Modification of Agreement is now outdated due to several changed circumstances. Most importantly, the citizens of Miami-Dade County have approved the issuance of General Obligation Bonds to fund the construction of a new museum of science at a new location and to fund modifications of the current museum of science facility for the use of Vizcaya Museum & Gardens which will occur only after the Museum of Science occupies the new museum of science.
3. The Parties agree that the 1998 Unexecuted Modification of Agreement was never executed, is outdated, and has no force and effect.
4. The Original Agreement and the 1989 Modification Agreement remain in force and effect, except as provided below.
5. The terms of the Original Agreement and the 1989 Modification Agreement are extended to run from 10 years from August 21, 2006 or one year after the certificate of occupancy is issued for the new museum of science which is being built with the General Obligation Bond funds, whichever is earlier. This change in the term will be retroactive to August 21, 2006. In the event that a certificate of occupancy for the new museum of science is not issued within 10 years from August 21, 2006, the parties may extend the term of this agreement for period of not more than the earlier of five years or one year after the certificate of occupancy is issued for the new museum of science. In addition, the parties may extend the term of this agreement for a reasonable amount of time beyond one year after the issuance of the certificate of occupancy if they agree that additional time is needed for the Museum of Science to move its collection or otherwise occupy the new museum of science, up to an additional twelve months. If, for any reason, the new museum of science is not built within fifteen years, the parties will cooperate in good faith to either re-negotiate the term of the lease, find the Museum of Science other suitable facilities, or make such other arrangements as they agree are appropriate.

6. The provisions of the Original Agreement and the 1989 Modification Agreement regarding the building of a 25,000 foot addition to the current museum of science facility, including any requirement that the Museum of Science build such an addition within a specified time, are eliminated.
7. If the Museum of Science intends to make any changes to the leased premises during the term of this lease that will impact the historic nature of, or any historic structure on, the leased property, the Museum will seek the advice and consent of the Miami Dade County Office of Historic Preservation through the County Manager's Office.
8. All other provisions in the Original Agreement and the 1989 Modification Agreement shall remain in full force and effect.

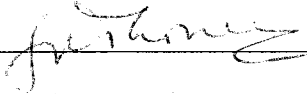

In witness of this Modification of Agreement, the following officials have signed below.

MEMORANDUM

Agenda Item No. 5(e)(44)

TO Honorable Mayor and Members
Board of County Commissioners

Joachim A. Avino

FROM Joachim A. Avino, P.E., P.L.S.
County Manager

DATE July 25, 1989

SUBJECT Modification of Agreement
With Museum of ScienceRECOMMENDATION

It is recommended that the Board approve the attached Modification of Agreement with the Museum of Science which has been amended to reflect the Museum's imminent building improvements by updating many standard clauses, extending the terms to 99 years and placing maximum time limits on achieving the proposed construction improvements.

This Modification was concurred with by the Culture and Recreation Committee at its July 6, 1989 meeting.

BACKGROUND

The Museum of Science is currently operating on County property under an Agreement which extends to 1991, plus provisions for a 5-year renewal.

However, the Museum recently unveiled an expansion program that includes significant construction. Those plans were reviewed by the Culture and Recreation Committee on December 13, 1988, at which time the Committee concurred that staff should meet with Museum representatives to negotiate and updated Agreement, with appropriate modifications to reflect these newly proposed improvements.

The attached Modification of Agreement presents those new terms and conditions. Several changes were made to reflect the absence of the Historical Associations shared use of the building, an extension of the term to 99 years, construction time requirements and a general updating of sections dealing with insurance, maintenance, indemnification, disclosure, etc.

The Board's approval of this Modification of Agreement is respectfully recommended to encourage and facilitate major improvements to a significant County resource.

The Museum, during the term hereof, shall pay all charges for installation, maintenance and operation for any necessary utilities and trash pick-up.

Upon the expiration of this Agreement, or its termination in any manner, the Museum shall deliver the premises to the County in no worse condition than the same was at the commencement of this Agreement, loss by fire or other casualty and ordinary wear and tear excepted.

LEASE, AGREEMENT OR PERMIT
PERFORMANCE EVALUATION PROGRAM
INTRODUCTION

The Lease, Agreement or Permit Performance Evaluation Program established operational standard for facilities and services afforded the public, a method for determining their performance level, and permits operators the opportunity to correct deficiencies without being unfairly penalized.

The rating determined under this program will be used as a basis for continuing or terminating a lease, agreement or permit authorization under which he operates, will be used as the basis for granting a right of preference to renewal or termination. However, notwithstanding the above, the Dade County Park and Recreation Department reserves the right to follow any emergency procedure as it deems a determination of unsatisfactory performance for any operator at any time when circumstances so warrant, regardless of the status of the operator's evaluation.

LEASE, AGREEMENT OR PERMIT
PERFORMANCE EVALUATION PROGRAM

PROGRAM OBJECTIVES

The primary objective of the Lease, Agreement or Permit Performance Evaluation Program is to provide visitors quality service which are safe, healthful and enjoyable, at a reasonable cost. The program is designed to ensure that the services provided by the program are of the highest quality and that the program is used as a management tool for ensuring adequate facilities and services for the visiting public.

Another major objective is to serve as a basis for continuing or terminating a lease, agreement or permit authorization as well as determining whether such an operator should be granted a right of preference to renewal. A third major objective is to be able to use the program as a management tool for ensuring adequate facilities and services for the visiting public.

DADE COUNTY PARK AND RECREATION DEPARTMENT
LEASE, AGREEMENT OR PERMIT
PERFORMANCE EVALUATION PROGRAM

GENERAL

The Lease, Agreement or Permit Performance Evaluation Program provides a systematic method for determining operational performance on a periodic and annual basis. The program is designed to establish a standard for facilities and services authorized under a lease, agreement or permit.

The standards established for each type of facility or service (operation) are composed of distinct elements which are pertinent to satisfactory performance. These elements are classified as follows: - First Priority (A), Second Priority (B), and minor - Third Priority (C) based on the relative importance of their importance, from a visitor and/or employee's well-being and enjoyment standpoint.

Wherever there is a conflict between the standards contained herein and any applicable existing laws, rules, regulations or ordinances, the latter shall prevail and will be considered a part of the evaluation criteria under this program.

Conformance to the standards is measured periodically through a comprehensive inspection and follow-up on each individual facility or operation authorized, based on the standards contained herein.

The first step in this operational evaluation process is to rate each lease, agreement or permit operator's operational performance overall for the year.

CLASSIFICATION, INSPECTION AND RATING PROCEDURES

Set forth below are the deficiency classification criteria and detailed inspection and rating procedures to be used in conducting a lease, agreement or permit operator's operational performance evaluation.

A. Element Classification - Elements on the Performance Evaluation Inspection Report forms have been classified as follows:

1. Major
First Priority (A) - Conditions or practices which have the potential for, or result in, serious impairment to the services essential to the well-being and enjoyment of visitors and/or employees.
2. Minor
Second Priority (B) - Conditions or practices which have the potential for, or result in, a moderate impairment to the services essential to the well-being and enjoyment of visitors and/or employees.
3. Minor
Third Priority (C) - Conditions or practices which have a potential for, or result in, a minor impairment to the services essential to the well-being and enjoyment of visitors and/or employees.

B. Deficiency Correction Criteria - Deficiencies identified during an evaluation shall be corrected in accordance with the following time frames, provided that the deficiency is not corrected within the time frame, the deficiency shall be considered a major deficiency and may be subject to enforcement action by the Director of Parks and Recreation when warranted by extenuating circumstances:

1. Major (A items) 15 days
(B items) 30 days
2. Minor (C items) 90 days

It should be understood that A type deficiencies are more serious and may take longer to correct than what is desired.

When the operator fails to correct Major (first and second priority) deficiencies within the correction period established by the Director, the Director may, when circumstances warrant, take one or more of the following actions:

1. Close, by posting, all or part of the area of an operator's operation when necessary for the protection of the area or the safety and welfare of persons or property.
2. Not approve a specific facility's price increase request(s) until corrections are made.
3. Take other appropriate administrative action in direct relationship to the severity and/or magnitude of the problems.

Inspection

1. Personnel - All periodic operational inspections shall be conducted by Dade County Park and Recreation Department employees who have been designated by the Director. Follow-up inspections, made to verify corrective or preventive actions, shall be conducted by either the person who made the periodic inspection or other personnel designated by the Director.

2. Periodic Inspection - The Director or authorized representative shall conduct comprehensive operational inspections of each operator's activity, utilizing the Performance Evaluation Inspection Report form. At least one annual operational inspection shall be conducted for each lease, agreement or permit. Additional operational inspections may be conducted throughout the year as deemed necessary. Inspections are to be unannounced; however, limited prior notice may be given when necessary to insure that the operator or his designated representative will be available to accompany the County personnel during the inspection.

Prior to the start of the inspection, the Inspector will enter, in the space provided on the Performance Evaluation Inspection Report form, all identified deficiencies, the name of the operator, address, name of operator, etc., and will pre-inspect General Standards Elements 1 through 60 through 70 that are applicable elements and rate them accordingly.

During the inspection, all deviations from the standards for each applicable element shall be noted as unsatisfactory. All elements in compliance with the standards where applicable shall be rated as satisfactory. A review will then

46

be made of all deviations to determine if there has been a material deviation from the standard for any applicable elements, and the required correction desired.

Immediately upon completing the inspection, the Director and operator, or their representatives, are to discuss the results of the inspection and arrive at a specific plan for making correction within the established correction period.

They shall then sign and date the form with a copy given to the operator of the designated representative. The signature of the designated representative does not necessarily indicate agreement with the inspection results. The designated representative has seen the inspection report and that it has been done in a fair and equitable manner. If the report has not been signed by the operator or the representative, then the report is to be transmitted promptly to the operator by registered mail.

D. Follow-up Inspections - The required periodic follow-up inspections should be made as soon as possible after the time specified in the report to determine whether or not deficiencies have been corrected. If the operator or the designated representative has not taken action to correct deficiencies noted in the report, the operator shall initiate action as per General Program 5, Deficiency Correction Criteria, listed above.

MEMORANDUM

Agenda Item No. 5 (f) (9)

TO Honorable Mayor and Members
Board of County Commissioners

DATE July 21, 1981

SUBJECT Agreement with the
Museum of Science, Inc.

FROM 
M. R. Speyer
County Manager

RECOMMENDATION

It is recommended that the Board approve the attached agreement with the Museum of Science, Inc. in which the Museum agrees to operate a science museum and planetarium on County property at the Museum's present location for ten years with an option to renew for an additional five year period.

BACKGROUND

The County has negotiated a new operating agreement with the Museum of Science in order to reflect the Museum's growth plans and to clarify County and Museum relationships and responsibilities. It includes various provisions from our previous operating agreement including the requirement that the County will maintain the basic structure of the building in which the exhibits are housed. We have also pledged the \$500,000 previously authorized by the County Commission from the Decade of Progress so that interior renovations can be made and new exhibits purchased. The Museum of Science will expand into the Historical Association's space when the HASF moves into the Cultural Center.

There are several other significant features in this operating agreement. By November of this year, we are anticipating that the Museum of Science will have launched a new exhibit program which should draw a large attendance. This agreement requires County approval for Museum exhibits but also grants the Museum the right to charge reasonable fees. Concurrently, we have greatly strengthened the Museum's reporting requirements to us, both financially and operationally, and to insure that these requirements are met, we have provided that County Commission funding may be allotted, at the County's discretion, to the salaries of the Museum Director, Planetarium Director and Business Manager. In this manner, the personnel would remain Museum employees but accountable to the County.

The Museum's new Director, Mr. Erik Speyer, has already completed plans for the Museum's immediate future. Rather than summarizing these plans for you, we have chosen to attach a copy of Mr. Speyer's memorandum to his Board under the premise that no one could duplicate Mr. Speyer's energy and enthusiasm for the Museum's future. We believe that the attached agreement with Museum of Science will aid the Museum and County to obtain our mutual objectives and your approval is respectfully recommended.

AGREEMENT FOR OPERATION
OF
MUSEUM OF SCIENCE AND PLANETARIUM

THIS AGREEMENT made this _____ day of _____, 1980, by and between DADE COUNTY, a political subdivision of the State of Florida, hereinafter called "COUNTY" acting by and through its Board of County Commissioners, and the MUSEUM OF SCIENCE, INC., a non-profit Florida corporation, hereinafter called "MUSEUM",

WITNESSETH:

WHEREAS, Dade County has constructed a Museum building and Planetarium on County owned lands consisting of a portion of the Vizcaya property for the purpose of providing facilities for a Museum of Science and Planetarium, and

WHEREAS, COUNTY and MUSEUM have previously entered into an agreement for the operation of a Museum and Planetarium in such facilities, and a Museum and Planetarium are being operated pursuant to such agreement, and

WHEREAS, COUNTY and MUSEUM are desirous of entering into a new agreement relative to said facilities to supersede said existing agreement,

NOW, THEREFORE, for and in consideration of the mutual covenants herein contained, the COUNTY and MUSEUM mutually agree as follows:

This Agreement shall supersede all prior agreements for operation of a Museum and Planetarium between the parties hereto.

ARTICLE II
DEMISED PREMISES

ARTICLE IV
OPTION TO RENEW

The MUSEUM shall have one (1) option to renew this Agreement for an additional five (5) year period to commence ten (10) years from date hereof. However, it is further understood and agreed by the parties hereto, that the COUNTY is prepared to expend the sum of \$500,000.00 as the result of a bond issue approved by the citizens of Dade County for the renovation, remodeling, and construction of exhibits and to incorporate the space presently being utilized by the Historical Association of Southern Florida, Inc., to the MUSEUM and it is further understood and agreed that it is the intent of the parties to charge a general admission fee to the general MUSEUM gallery areas upon the completion of these expenditures or prior

thereto if deemed feasible. The General admission charges and schedules shall be submitted by the Board of Governors to the County Manager or his designee for approval.

The MUSEUM shall operate at its expense, except as provided elsewhere in this Agreement, a Planetarium and Museum of Science within the demised premises. The MUSEUM shall operate according to standards generally accepted for similar planetariums and museums of science.

That portion of the demised premises described as roadways and grounds constitutes the area for ingress and egress to the Museum and Historical facilities and to COUNTY's facilities located adjacent to said roadways and grounds, and is also used for parking and general outdoor use. The MUSEUM shall have the non-exclusive right to utilize said roadways and grounds for their intended purposes including the non-exclusive right to use the grounds for the programs and activities of the Museum and Planetarium.

ARTICLE VI

The MUSEUM may not assign nor sublet this Agreement. COUNTY shall exercise this right in such a manner as to create a minimum of interference with the operation of the Planetarium and Museum.

MEMORANDUM FROM ERIK SPEYER - JUNE 23, 1981

This memorandum to the members of the Board is the first of what I hope will be many similar update reports in the near future. Events are moving so rapidly at the Museum of Science that I feel all concerned should be kept informed and offered the choice of comment or disagreement. This dissemination of information should also allow more time for discussions at the monthly Board meetings.

My first job as Museum Director was to establish an exhibit program. But it became obvious that this would have to be delayed until the building was made not only ready for exhibits, but habitable for the residents and visitors alike. In this I have received the greatest cooperation from all levels of county government, who employ a staff of enthusiastic and supportive personnel.

Since the Historical Museum's air conditioning system was nearly inoperative, and the Museum of Science's unit was operating with an enormous energy and water loss, the repair of the air conditioning became a priority item. I am happy to report that early in July the Historical Museum will no longer have two inefficient units on the roof, but will be tied to our chilled water system which in turn is being augmented by the addition of a larger water cooling tower. This has been made possible by a grant from the County of \$75,000. The 85,000 gallons per month water loss through our air conditioning necessitated the emergency closing of the Museum at 5 P.M. This has caused some hardships, especially among our affiliate groups, but now that the water crisis is over, evening meetings can begin again. There will be two days of total shut-down when the tower is being replaced, which will cause additional problems for our summer-program classes. But the contractor, Alltemp, has assured us the greatest speed possible in the change over.

The roof over the area of the Historical Museum's air conditioners will be redone while the units are being replaced, a job that is going to require some tricky scheduling. This is the area that any casual visitor to the Museum can see is collapsing and is generally a soggy disagreeable mess.

The next item of importance was not going to be of such high priority, but events did not allow me to put it off. As a matter of fact, I only had one week to initiate the work and get the ball rolling on this one.

A private non-profit institution supported by memberships and tax deductible gifts and donations.

As some of you might already know, the excellent traveling Chevron exhibit on creativity was tentatively scheduled at the Museum for three months in 1982, if the Museum had the available floor space to house the exhibit. After consulting with Chevron executives, it became obvious that the planned changes in the interior floor spaces would have to be accelerated if they were to be done before the arrival of this exhibit. The arrival date is now set for November 4, 1981, and the changes have become critical. The single greatest problem in the Museum as presently designed is the lack of floor space for exhibits, and this essentially, is what will be changed over the next three months. When finished, the total clear floor area will be over 10,000 square feet. This will be brought about by the roofing over of both the so-called hammock and the Mayan Plaza. These areas will have floors on the same level as the Museum. In addition, all interior partition walls will be removed except for the Mini-Theater, the Everglades and Coral Reef dioramas and the room which is presently being used for membership services. This room will be used as a control room to house all remote audio-visual equipment and computers, and will have its own air conditioner on the roof. All the spaces in addition to some remaining walls, will be carpeted. The walls above the carpet will be black, as will the ceiling and all ducting and electrical conduits. The only two areas with acoustical drop ceilings will be the Mini-Theater and the area between the Coral Reef and Everglades dioramas. These will have sound and light animation available at push-button demand. All other exhibits will be removed to either warehouse storage or on extended loan (e.g. the Orchid Exhibit and poisonous plants to Fairchild Gardens). The disposition of these exhibits will be done in July after the next Board meeting, at which time this matter can be discussed.

Many other smaller details have been worked out with the architects and the County, and the job should go out for bids during the week of June 29. If all goes well, work will begin in mid-July and finish by November 1. During the construction period no one will be allowed in the gallery area, so an additional glass door will be added beforehand to either classroom A or B to allow access during the summer classes. Classroom C is accessible through the Historical Museum entrance. Offices will be entered through the educational office. None of this work will affect the operation of the Planetarium.

Two additional contracts will be let to be completed before November 1: that of a new KVA transformer (to replace one hit by lightning in 1980) and one covering complete renovation of all restrooms in the building. Finally, all the planting that are in front of the building will be

removed and the area re-landscaped for the sake of the safety of our visitors, since the front lights can then again be turned on to light the parking area.

In early June two members of the Board and myself visited some outstanding science museums in the U.S. and Canada and found that the exhibits as designed and built by the Ontario Science Center in Toronto precisely fit what we wished to see in the Museum of Science. These exhibits which we will list at the next board meeting, had been so carefully researched, so successfully involved the visitor, and were so rewarding in the learning experience that there was no comparison with the other museums we saw.

Except one. The Discovery Place in Charlotte, North Carolina has, by coincidence, embarked on an exhibit program based on the Toronto museum designs and covering the same exhibits we had wished to see in Miami. A great deal of time and money can be saved by contracting with the Discovery Place to build another copy of our exhibits as they build theirs. We have now entered into negotiations with the Discovery Place and it appears that a sizable portion of these exhibits can be made available the day the Chevron exhibit moves out. This means that the entrance fee we begin charging in November can continue uninterrupted.

A careful plan of all exhibits, including their placement in a large scale model (now under construction) a detailed description of these exhibits will be made available to Board members.

I have asked the Guild to consider moving the gift shop to the room now occupied by the snack bar to provide our visitors with a larger and therefore better stocked and more exciting gift shop. To this end the Guild is negotiating with a professional gift shop manager to operate the store with the help of the Guild members.

There has been so much to do in the eight weeks I have been the Director that I have not had a change to communicate with all those interested in the Museum of Science and its future. Let me assure you that you will be kept abreast from now on. It appears that the first phase of our plan can be finished in less than a year. Then we shall begin our second phase.
